

## Paraffin Tissue Section Slide Certificate of Analysis

**Product Name:** Paraffin Tissue Section Slide

**Catalog No.:** T2XXXXXX

**Shipping Condition:** Shipped at Room Temperature

**Storage Condition:** Room Temperature

**Shelf Life:** One year from the date of receipt under proper storage condition

**Description**

Tissue was fixed in formalin immediately after excision, and embedded in paraffin. Tissue sections are 5  $\mu\text{m}$  in thickness, and mounted on positively charged glass slides. The tissue section slides can be used for both immunohistochemistry and *in situ* hybridization. One of the tissue section slides from each lot was stained with H & E to ensure the quality. It is an ideal product for rapid cellular localization of RNA and protein expression.

**FOR RESEARCH USE ONLY**
