

DATASHEET

Retro-SV40

Cat. CIP-0012

Product Name: Retro-SV40

Titer: 1×10^6 cfu/ml

Volume: 10 ml

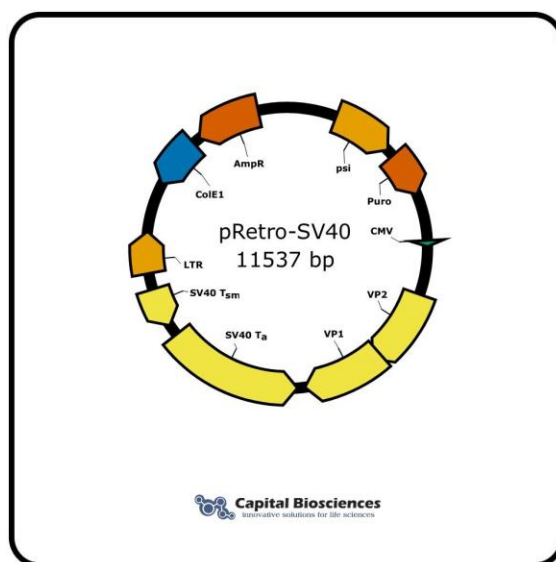

Medium: DMEM, 10%FBS

Storage: -70°C

Description: Retro-SV40 virus is a recombinant retrovirus containing SV40 T-antigens (both large and small) and viral coating proteins. The virus can be used to infect target cells for cell immortalization.

How to use: Thaw the recombinant lentivirus supernatant in a 37°C water bath; remove it from the bath immediately when thawed. Prepare and freeze aliquots if not all volume is used.
