

DATASHEET

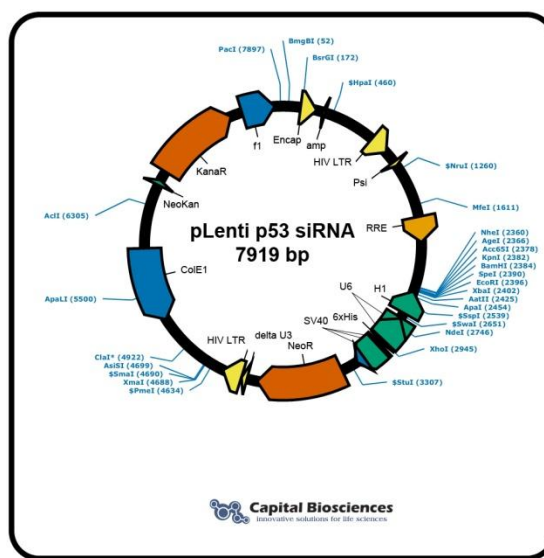

Recombinant Lenti-p53 siRNA Virus

Cat. CIP-0002

Product Name: Lenti-p53 siRNA Virus

Description: Lenti-p53 siRNA Virus is a recombinant lentivirus ready for transduction of target cells to silence p53 gene. The virus can be used to infect primary cells for immortalization.

Lenti-p53 siRNA vector:

Antibiotic: Neomycin

Volume: 10 ml

Titer: 1×10^6 pfu/ml

Medium: DMEM with 2.5% glycerol

Storage: -70°C

For Research Use Only
